@Organizer-Zeyi Li 🤔 Could you please verify if `observation.state` in `lehome-challenge/Datasets/example/top_long_merged/data/chunk-000/file-000.parquet` refers to the joint positions? I noticed that the initial position of the robot arm in the training data (from `file-000.parquet`) differs from the initial position set in `lehome-challenge/source/lehome/lehome/tasks/bedroom/garment_bi_cfg_v2.py`. This discrepancy is causing very poor evaluation results.

Furthermore, this inconsistency is also visible when comparing the dataset videos with the videos generated during evaluation. Could you please look into this?

@Organizer-Zeyi Li 🤔 The video is ok, The current parameters are the result of trade-offs between visual and physical balance, and may hav...

**Pranav Saroha** 上午 01:05

thanks. any suggestions on what parameters to tweak? any good tutorial, I am not very familiar with IsaacSim's options.

**Organizer-Zeyi Li** 🤔 下午 08:16

You don't need to modify the clothing's parameters: the clothing's physical parameters and initial position range are fixed.
